

Multiplication challenge

Cat's Family

Another rule of the card game Multipli Cat's

For 8 year olds and up.

For 2 to 6 players.

Time a game lasts : 10 to 20 min

Necessary cards : Multiplication (X) cards and Product cards

Aim of the game : Win a maximum of X cards by hitting as fast as possible on the right number placed on the table.

Principle of the game :

3 to 6 players

You place the 21 Product cards on the table, any way you want, the side with the number face up. You choose the corresponding X cards that you deal equally between the players. Each player places his stack in front of him, face down.

Then, each their turn, the players take the card on top of the stack and read the multiplication out loud. The other players must hit as fast as possible on the number they think is right.

Beware : you can hit only once per multiplication!

The player who has read the card gives the solution. The player who was the fastest to have the good solution receives the X card, and he places it face up in front of him. If no one had the right answer, the X card is put aside.

When all the X cards have been given (or put aside), each player counts how many cards he has won. The winner is the one with the most X cards.

For 2 players : instead of reading the X card, the player turns it over quickly (like in the main rule). That way, both players can see it at the same time.
